## 1. Introduction

PixelMan is a Typst library that draws customizable pixel art characters using CeTZ (CeTZ, ein Typst Zeichenpaket). Instead of using external PNG images, characters are rendered as native vector graphics that scale perfectly.

## 2. Installation

Add to your `typst.toml` dependencies:

```
[dependencies]
pixelman = "0.1.0"
```

Or use locally:

```
#import "@local/pixelman:0.1.0": *
```

## 3. Quick Start

```
#import "@local/pixelman:0.1.0": *

// Basic usage
#bob() #alice() #eve()

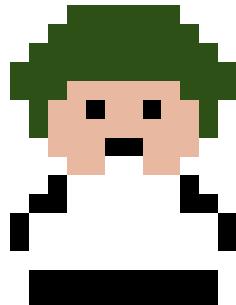

// Custom size
#bob(size: 60pt)

// Custom colors
#alice(skin: brown, hair: red, shirt: blue)
```

## 4. Character Gallery

### 4.1. Bob

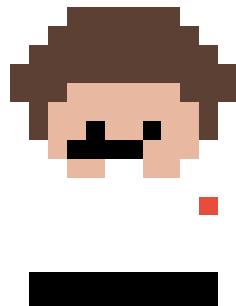

Green hair, white shirt, black vest.

```
#bob()  
#bob(size: 60pt)          // Larger  
#bob(hair: blue, shirt: red) // Custom colors
```

### 4.2. Alice

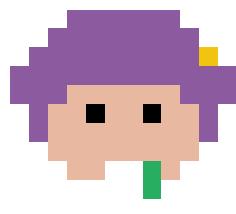

Brown hair, white shirt with red pocket, mustache.

```
#alice()  
#alice(size: 50pt, hair: black)
```

### 4.3. Christina

Purple hair with yellow accessory, white shirt with green tie.

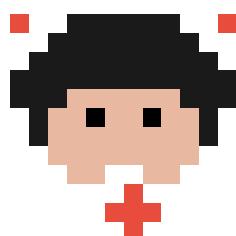

[REDACTED]

```
#christina()  
#christina(size: 55pt)
```

### 4.4. Mary

Black hair with red ribbons, white shirt with red bow.

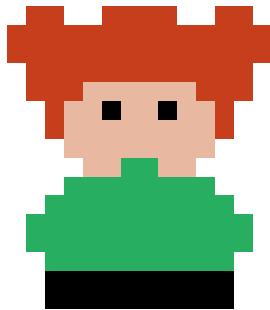

[REDACTED]

```
#mary()  
#mary(size: 45pt, hair: brown)
```

#### 4.5. Eve

Red curly hair, green shirt.

```
#eve()  
#eve(size: 50pt, hair: pink)
```

### 5. All Characters

### 6. Customization

All characters accept these parameters:

- `size`: Overall size (default: 40pt)
- `skin`: Skin color
- `hair`: Hair color
- `shirt`: Shirt color
- `pants`: Pants color

### 7. Available Colors

Access the color palette:

```
#import "@local/pixelman:0.1.0": palette  
  
#palette.skin      // Default skin tone  
#palette.hair-brown // Brown hair  
#palette.shirt-blue // Blue shirt  
// etc.
```

### 8. Advanced Usage

#### 8.1. Inline Characters

Use in text:

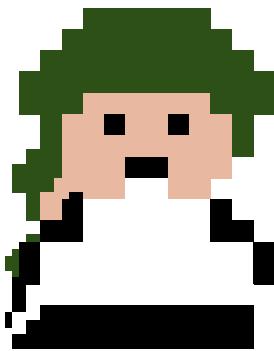

```
#bob() says hello to #alice()!
```

Result: ( ... ) => ...  
... (114 it)

```
(...) => ...,
(...) => ...,
(...) => ...,
(...) => ...,
(...) => ...,
(...) => ...,
(...) => ...,
(...) => ...,
(...) => ...,
(...) => ...,
(...) => ...,
(...) => ...,
(...) => ...,
(...) => ...,
(...) => ...,
(...) => ...,
(...) => ...,
(...) => ...,
(...) => ...,
(...) => ...,
(...) => ...,
(...) => ...,
(...) => ...,
(...) => ...,
(...) => ...,
(...) => ...,
(...) => ...,
... (114 items omitted),
)!
```

## 8.2. Different Sizes

```
#bob(size: 20pt) // Small
#bob(size: 40pt) // Default
#bob(size: 80pt) // Large
```

## 9. API Reference

### 9.1. Functions

Each character function has the same signature:

```
#let character-name(  
  size: 40pt,  
  skin: palette.skin,  
  hair: palette.hair-color,  
  shirt: palette.shirt-color,  
  pants: palette.pants-color,  
) = { ... }
```

Available characters: bob, alice, christina, mary, eve
